## Conference of Covenant of Mayors for Sub-Saharan Africa (CoM SSA) Climate Chance Summit Africa 2019

### « Towards the Institutionalization of Local Climate Action and Access to Finance »

16 October 2019

Accra, Ghana

The recent Intergovernmental Panel on Climate Change (IPCC) Report on global warming confirms unequivocally that the implementation of the current Nationally Determined Contributions (NDCs) will not be sufficient to limit global warming to 1.5 °C. With the adoption of the Paris Agreement Work Programme and the “Katowice rulebook”, the implementation of the Paris Agreement will face its real test and call for a questioning of the approach adopted so far, especially in Africa. Sub-national actors are key to help bridging the gap between national climate targets and the concrete action required on the ground. In that regard, there is a need for a paradigm shift from the top-down approach followed in the definition of Locally Determined Contributions (LDCs) in favor of more consideration of action taken and implemented at local level.

In that perspective, the Covenant of Mayors for Sub-Saharan Africa (CoM SSA), launched by the European Union in 2015, has made substantial progress in laying the foundations of a bottom-up approach to the fight against climate change. In its forth project year, the CoM SSA initiative continued making progress towards its overall and specific objectives and in its three main work streams: (1) vertical integration and political advocacy (2) technical assistance and capacity development to pilot and signatory cities, including also CSOs, and (3) promotion, communication, raising awareness and visibility of the initiative.

The CoM SSA Conference will be the occasion to share the lessons learnt from the cities engaged in the initiative as well as moving forward.

#### In this context, the CoM SSA Conference will seek to reflect on the following elements:

1. The lessons learned from the CoM SSA pilot cities and partners.
2. How can we scale-up the successes of CoM SSA signatories? How can we ensure access to climate finance for local governments?
3. How can the Sustainable Energy Access and Climate Action Plans (SEACAPs) developed by CoM SSA signatories constitute a form of LDCs in order to foster the Paris Agreement?
4. How to boost the implementation of SEACAPs through decentralized cooperation?.
5. The role of supporting structures (ie: CSOs, national associations of local governments) in SEACAP development, implementation and evaluation.
